### Amazon.com: Refrigerated Air Dryer

A refrigerated air dryer chills the compressed air to 33 – 40 degrees Fahrenheit at which water vapor is condensed into a liquid and is then expelled from the system via a water-trap and automatic drain. The cool dry air then is typically re-heated to around room temperature before exiting the dryer and going to your production lines.

### Do I Need a Refrigerated or Desiccant Air Dryer?—Fluid

201 Series Instruction Manual Ultra Air Refrigerated Dryers Controls A. High-low refrigerant cut-out switch (models 100-2000) High side setting: R22 - 350 cut-out, Low side setting: R22 - 50 cut-out Cut out switch senses high and low refrigerant pressure at refrigerant compressor inlet and outlet ports. B.
