This book presents an interpretive, macro-historical, and

sociological account of martyrdom. Moving

away from the notion of martyrdom as an object

of individual behavior

and seeing it instead as a significant cultural work

performed by

communities in the

wake of a violent death, it provides a novel interpretation of Western political and religious history. In addition to thus redressing the disproportionate attention given to the concept's relationship to Islam, the author offers a new perspective on two defining historical processes:

secularization and the
rise of modern
sovereignty in the form
of the nation-state. An
innovative analysis of
the role of sacrifice in
contemporary culture,
which constitutes a
timely critique of long-
dominant theories of
disenchantment and the
privatization of religion,
The Ultimate Sacrifice
will appeal to

sociologists and social theorists with interests in religion, politics, and the connection between the two.

This study interprets debates within the Weimar literary Left over the relation of literature to politics. The historical key to these debates was the German revolution of 1918-1919

and the idea of
-Bolshevism-, i.e. a
symbolic allegiance to
the only successful
revolutionary movement
of 1917-1920. In
covering the arguments
of figures like G. Grosz,
W. Herzfelde, E.
Piscator, J. Becher, A.
Doblin, B. Brecht and
W. Benjamin, it
demonstrates the great
ambivalence and

historical specificity of the stances writers adopted in the Twenties over the issue of political allegiance to Marxism. Thus the work contributes to a historical appreciation of the mentality of the Weimar Republic and especially of -Weimar Culture-. But its concerns extend beyond Weimar to the larger
