Some of the technical devices in these pieces include: right-hand melody with left-hand accompaniment; diatonic and chromatic scalar and arpeggio figurations; syncopated melodies and trills. Many of the studies can be transposed into other keys and practiced at varied tempos.

The Public Investment Management (PIM) Reference Guide aims to convey country experiences and good international practices as a basis for decisions on how to address a country-specific PIM reform agenda. The country references are drawn largely from previous diagnostics and technical assistance reports of the World Bank. The application of country diagnostics and assessments has revealed a need to address the following issues when undertaking a country reform in PIM: • Clarification of the definition and scope of public investment and public investment management • Establishment of a sound legal, regulatory, and institutional setting for PIM, making sure it is linked to the budget process • Allocation of roles and responsibilities for key players in PIM across government • Strengthening of guidance on project preappraisal, appraisal, and selection-prioritization procedures and deepening of project appraisal methodologies • Integration of strategic planning, project appraisal-selection, and capital budgeting • Management of multiyear capital budget allocations and commitments • Efforts to address effective implementation, procurement, and monitoring of projects • Strengthening of asset management and ex post evaluation • Integration of PIM and public-private partnership (PPP) in a unified framework • Rationalization and prioritization of the existing PIM project portfolio • Development of a PIM database and information technology in the form of a PIM information system. The PIM Reference Guide does not seek to provide definitive answers or standard guidance for the common PIM issues facing countries. Nor does it seek to provide a detailed template for replication across countries: this would be impossible given the diversity of country situations. Instead, each chapter begins with an overview of the specific reform issue, lists approaches and experiences from different countries, and summarizes the references and good practices to be considered in designing country-specific reform actions.

Burgm\u00fcller's most famous work, the 25 Progressive Pieces, are short compositions with descriptive titles. Easier than his Opp. 105 and 109, each selection exposes students to a different technical challenge with the main emphasis on the phrasing, articulation, and dynamics often found in Romantic piano music. The collection includes "Arabesque" and "Ballade," both popular with many early-intermediate pianists.

(Jazz Transcriptions).
