In the first volume of Post Editions's new series on the creative potential of seemingly everyday materials, the subject is paper - in amazing depth. This striking book asks nine scholars and artists to take a multi-layered look at paper, from its beginnings in second-century China to surprising contemporary approaches. Essay topics include: species of wasps and hornets that make paper and cardboard remarkably similar to our own; the 18th-century German clergyman whose life's work was experimenting with various materials to make paper; and Cardboardia, a community of "visionary architecture." Origami master Paul Jackson writes about "paper music" - using paper as an acoustic medium, and Chiaki Morita introduces washi, the Japanese art of hand-made paper from the mulberry tree. Stunning black and white photos complete this impeccable package.
