information architecture swiftly and clearly.

## **Information Architecture: Blueprints for the Web, 2nd ...**

"Information Architecture: Blueprints for the Web" is, essentially, a primer on successful website design. Unlike the many dense manual-like books on the topic, the straightforward, accessible, and often funny prose of Wodtke's book makes it an effortless read.

## **Information Architecture: Blueprints for the Web - Boxes ...**

High-level blueprints are often created by information architects as part of a top-down information architecture process. Starting with the main page, the information architect might use the process of developing a blueprint to iteratively flesh out more and more of the architecture, adding subsidiary pages, increasing levels of detail, and working out the navigation from the top down.

## **Blueprints - Information Architecture for the World Wide ...**

Information architecture (IA) focuses on organizing, structuring, and labeling content in an effective and sustainable way. The goal is to help users find information and complete tasks. To do this, you need to understand how the pieces fit together to create the larger picture, how items relate to each other within the system.
