The Design Manual by David Whitbread is an indispensable and comprehensive reference for

traditional and digital publishing. From beginners to professional graphic designers, desktop publishers and graphic design students, The Design Manual provides essential information on conceptual approaches, planning and project development techniques for print, web and multimedia production. Design tasks are divided into sections on publication, corporate identity, on-screen and advertising design. There is discussion of specific skills such as branding and logo design; stationery, catalogue, annual report and newsletter production; websites; storyboarding and animation techniques; and more. The production section discusses layout and typography for print and screen, colour and colour systems, printing and finishing processes. With numerous checklists and practical tips throughout the text, The Design Manual has become a standard reference for anyone involved in or interested in design.

Given the vast amount of research related to behavioral assessment, it is difficult for clinicians to keep abreast of new developments. In recent years, there have been advances in assessment, case conceptualization, treatment planning, treatment strategies for specific disorders, and considerations of new ethical and legal issues. Keeping track of advances requires monitoring diverse resources limited to specific disorders, many of which are theoretical rather than practical, or that offer clinical advice without providing the evidence base for treatment recommendations. This handbook was created to fill this gap, summarizing critical information for adult behavioral assessment. The Clinician ' s Handbook of Adult Behavioral Assessment provides a single source for understanding new developments in this field, cutting across strategies, techniques, and disorders. Assessment strategies are presented in context with the research behind those strategies, along with discussions of clinical utility, and how assessment and conceptualization fit in with treatment planning. The volume is organized in three sections, beginning with general issues, followed by evaluations of specific disorders and problems, and closing with special issues. To ensure cross chapter consistency in the coverage of disorders, these chapters are formatted to contain an introduction, assessment strategies, research basis, clinical utility, conceptualization and treatment planning, a case study, and summary. Special issue coverage includes computerized assessment, evaluating older adults, behavioral neuropsychology, ethical-legal issues, work-related issues, and value change in adults with acquired disabilities. Suitable for beginning and established clinicians in practice, this handbook will provide a ready reference toward effective adult behavioral assessment.
