Specifically, the Linkage service function inv_linkage.Event pfc_clicked (xpos, ypos, row, dwo) returns FAILURE when the user clicks on a column header in the dw, which causes the clicked event to return a 1.... PFC linkage service question. I have a need to delete the detail rows associated with a master row when it is deleted.

PFC Linkage Service - sybase.powerbuilder.general - CodeVerge
For the Retrieval style of the Linkage service to properly retrieve, you must have the proper retrieval arguments set up in your Detail's DataWindow object, in its Datasource. The PFC code will automatically pass the retrieval arguments for you, but if the DataWindow object is not expecting any retrieval arguments, they will be ignored, and so the retrieve will not work as expected.

Linkage Service FAQs - PFC Guide
PFC Sort vs. PFC Linkage I have a datawindow which I used the PFC Sort service on, only to use the column heading type sort. This worked fine. Then I set up the same datawindow to use the PFC Linkage service, using the filter feature. This particular datawindow was the master.

PFC Datawindow Linkage Service
The PowerBuilder Foundation Class Library (PFC) is a set of PowerBuilder objects that you customize and use to develop class libraries. You can use these objects to provide corporate, departmental, or application consistency. PFC also includes objects that you use as is for utility purposes, such as debugging. PowerBuilder objects PFC is written in PowerBuilder and delivered as PowerBuilder objects

PowerBuilder Foundation Class Library User's Guide
I have two master-detail datawindow which are linked through pfc's linkage service. Now I have read in the documentation that when using FILTER style retrieval code must be placed inside the detail window's pfc_retrieve event.. What code/function call should I place there so that when the master window's retrieval has been finished, the detail window's data are also retrieved?

Powerbuilder Powersoft Users Guide Version 30 [EBOOK]
PFC Linkage service and dw updates Hi all, I'm relatively new to PFC and have been using the Online Books to figure out how to use it. I'm using the linkage service, but I'm not sure how to handle updates. My master and detail windows are one to one (the detail shows one row in complete detail, the master shows several rows in brief).

dw linkage - sybase.powerbuilder.pfc
PFC Datawindow Linkage Service - sybase.powerbuilder.pfc However, the linkage service interacts with multiple datawindow controls. The constructor event sequence of these controls depends on the order in which they were placed on the window. This sequence is not predictable and may change after another control is added to the window or a user object.

Powerbuilder Pfc Datawindow Linkage User Guide
Ok, I am an absolute beginner in powerbuilder. Currently I am working in a company where powerbuilder is being used to develop an application. This application heavily uses PFC. Now I had no prior powerbuilder training when I joined this company, but I learned a few things while working in this application, e.g., datawindow, powerscript etc.

Powerbuilder PFC: Where to start learning - Stack Overflow
PowerBuilder has a native data-handling object called a DataWindow, which can be used to create, edit, and display data from the database. This object gives the programmer a number of tools for specifying and controlling user interface appearance and behavior, and also provides simplified access to database content and JSON or XML from Web services .
