Online social media have transformed the face of human interaction in the 21st century. Wikis, blogs, online groups and forums, podcasts, virtual worlds, and social tagging are but a few of the applications enabling innovative behaviors that support acquisition, access, manipulation, retrieval, and visualization of information. It is, therefore, no surprise that educational practitioners and theorists have begun to explore how social media can be harnessed to describe and implement new paradigms for communication, learning, and education. The editors' goal in publishing this book was to identify original research on the application of online social media and related technologies in education as well as emerging applications in Web technologies that could provide and shape future educational platforms. The selected contributions deal with questions such as how social media can truly enrich and enhance learning and teaching experiences in ways not otherwise possible;

how learning can be integrated in a distributed and ubiquitous social computing environment; or what theories, paradigms, and models are applicable for the support of social computing in education. Researchers in education or educational software will find interesting and sometimes provocative chapters on paradigms and methodologies, virtual and mobile learning spaces, and assessment and social factors. Practitioners in these fields will benefit from an additional section devoted to case studies and first experience reports.

Orson Welles called her "The most exciting woman in the world." He was talking about the legendary Eartha Kitt -- the pioneer entertainer who broke race and sex barriers while shocking and seducing audiences around the world. In these pages, this stunning, sexy, fiercely independent woman relates the story of her extraordinary life. It's a life in which she was closely involved with personalities as varied as Sammy Davis, Jr., Orson Welles and her "soulmate," James Dean. Eartha Kitt has won awards and nominations for her work on stage and in film, both as an actress and a singer. She is acclaimed as one of the world's best all-around female entertainers. In *I'm Still Here* you'll find out how Eartha Kitt got where she is, and why she is very different and never dull. Book jacket.

On the eve of her wedding anniversary, Mary Gooch is waiting for her husband to come home, listening for his car along the dark, icy roads. As the night draws on, and he fails to appear, Mary reflects on the true nature of their marriage: the secrets, the silences, and the unmentionable yet inescapable fact that for each loss and disappointment, there has been a corresponding physical gain: the woman she once was is now imprisoned in mountainous flesh. *The Wife's Tale* is the inspirational story of the journey Mary is finally forced to make across a continent, ostensibly in search of her husband, but eventually towards the self she has buried for too long.

Sams Teach Yourself Samsung Galaxy Tab" in 10 Minutes offers straightforward, practical answers for fast results. By working through the 10-minute lessons, you'll learn everything you need to know to quickly and easily get up to speed on the Samsung GALAXY Tab. Step-by-step instructions walk you through the most common questions, issues, and tasks... "Did You Know?" tips offer insider advice and shortcuts... "Watch Out!" alerts help you avoid problems. Sams Teach Yourself Samsung Galaxy Tab" in 10 Minutes will provide beginner and experienced users with fast at a glance tips pointing out helpful shortcuts and solutions, cautions to help avoid common Samsung Galaxy Tab pitfalls, and is written in a clear easy to understand format. This title contains the proceedings of the 2013 5th International Conference on Advanced Computer Control, held in Singapore. The topics covered include: Modern and advanced control strategies; human-machine systems; multimedia and communication systems; database systems; robotics and automation; and much more.

Immunization during pregnancy with currently recommended vaccines prevents infection in the mother, the unborn fetus, and the young infant, and there is an increasing focus from different stakeholders to use this approach for other infections of importance to protect these vulnerable groups. The aim of this Maternal Immunization book is to provide a contemporary overview of vaccines used in pregnancy (and the lactation period), with emphasis on aspects of importance for the target groups, namely, rationale for the use of vaccines in pregnancy, safety, immunogenicity (immunology), timing to vaccinate, repeat doses, protective effects in the mother, fetus, and infant, and public acceptance and implementation, of existing and of future vaccines. Provides an overview of a quickly evolving topic. This will benefit the reader who wishes to rapidly become informed and up-to-date with new developments in this field Suitable to a broad audience: scientific researchers, obstetricians, gynecologists, neonatologists, vaccinators, pediatricians, students, and industry. Maternal vaccination impacts a wide range of specialists Allows health care professionals/researchers to gain insight into other aspects of vaccination in pregnancy outside of their specialism Is coauthored by specialists from multiple disciplines, providing a diverse view of the subject, increasing its interest and appeal Creates awareness of the current developments in this area of medicine and of the potential of maternal vaccination to improve the health of mothers and infants worldwide

This volume provides a comprehensive and world-class review of the field of histiocytic neoplasms and hemophagocytic lymphohistiocytosis (HLH). It reviews all the advances in the field of histiocytoses during the last ten years, particularly with regards to the genomic findings in LCH and other histiocytic neoplasms and the new suggested classification of the histiocytic disorders. Additionally, it features a state-of-the art update on the most recent

treatment strategies for LCH, including the results of the last LCH-III international trial, salvage therapies such as reduced-intensity conditioning (RIC) stem cell transplant (SCT), and targeted therapies with BRAF and MEK inhibitors, as well as the challenging cases of CNS-neurodegenerative LCH and its therapeutic perspectives. For primary and secondary HLH the book updates the most recent genetic and pathophysiological findings, including macrophage-activation syndrome (MAS), and includes a special chapter on HLH in adults. Treatment chapters encompass therapy for newly diagnosed HLH and refractory disease as well as stem-cell transplantation and novel therapies. The text also highlights the most recent advances in the treatment of the uncommon histiocytic disorders, such as Erdheim-Chester disease (ECD), Juvenile xanthogranuloma (JXG) and JXG-like conditions, Rosai-Dorfman disease (RDD), and the very rare malignant histiocytoses. Written by international experts in the field, Histiocytic Disorders is a valuable resource for clinicians, researchers, fellows and residents who are interested in or manage histiocytic disorders in children and adults.
