In the Code Inspector, you can define inspections that, with the help of check variants, examine certain sets of objects. As the result of an inspection, you receive information messages, warning messages, or error messages on different properties of the examined objects. The concepts are explained in the blog by Nick Young Setting up and using the SAP Code Inspector.

know more than the people staring at you. Even now, there are many sources to learning, reading a cassette still becomes the first complementary as a great way.

Sap Code Inspector Guide - Kora
The ABAP Workbench offers a variety of tools for doing static and dynamic checks of the correctness of your programs and other objects. The Code Inspector resolves the question of how to use these separate tools comfortably and efficiently. With the Code Inspector, you can run all of ABAP's checking tools at one time.

Read Book Sap Code Inspector Guide

The code inspector is "static" in the sense that it does not dynamically check the code in debug mode, but rather by applying a set of rules worked out by the SAP engineers. The code inspector can produce a useful report informing developers that they have defined data items that they never reference, for example.
