The Female

Reproductive System Se

The organs of the female reproductive system are found both inside and outside of the female body. The organs inside the body are in the pelvis, which

Acces PDF The Female

is the lowest part of the body cavity above the legs. The organs found inside the body include:

Vagina - the area between the lower part of the womb (the cervix) and the outside of the body. The vagina receives the penis during sexual intercourse and is a passageway for childbirth.

gamete (egg or ovum).

These two gametes meet within the female's uterine tubes located one on each side of the upper pelvic cavity, and begin to create a new individual.
