Pounder's Marine Diesel Engines and Gas Turbines, Tenth Edition, gives engineering cadets, marine engineers, ship operators and managers insights into currently available engines and auxiliary equipment and trends for the future. This new edition introduces new engine models that will be most commonly installed in ships over the next decade, as well as the latest legislation and pollutant emissions procedures. Since publication of the last edition in 2009, a number of emission control areas (ECAs) have been established by the International Maritime Organization (IMO) in which exhaust emissions are subject to even more stringent controls. In addition, there are now rules that affect new ships and their emission of CO₂ measured as a product of cargo carried. Provides the latest emission control technologies, such as SCR and water scrubbers. Contains complete updates of legislation and pollutant emission procedures. Includes the latest emission control technologies and expands upon remote monitoring and control of engines.

World Corrosion is a constant, often expensive, and sometimes dangerous problem for boaters. Moisture, salt, electrical currents, and chemicals create a potent combination that can attack the metallic (and sometimes nonmetallic) parts of your boat. Everett Collier, an expert in marine technology, details all the types of corrosion—including simple galvanic, electrochemical, and electrolytic—and explains how to identify, combat, and prevent them. The most comprehensive book on this subject, *The Boatowner's Guide to Corrosion* shows you how to: Prevent corrosion with proper grounding, cathodic protection, protective coatings, and careful selection and matching of metal parts Protect your boat's hull, deck gear, masts, and rigging, as well as its propulsion, electrical, plumbing, and steering systems Recognize and cure developing corrosion before it can damage your boat

In his latest book, Calder walks the reader through the repair, maintenance, and setting up of the boat's primary systems, including the electrical system, electronics equipment, generator sets, solar panels, wind and water generators, the engine, transmission, pumps, steering, waste disposal systems, and more. Destined to become a highly trusted companion aboard all types of boats for years to come.

image. They are the shock doctors. Exposing these global profiteers, Naomi Klein discovered information and connections that shocked even her about how comprehensively the shock doctors' beliefs now dominate our world - and how this domination has been achieved. Raking in billions out of the tsunami, plundering Russia, exploiting Iraq - this is the chilling tale of how a few are making a killing while more are getting killed.
