* The most comprehensive introduction to optical communications available anywhere--from the author of Optical Fiber Communications, the field's leading text * Concise, illustrated module-style chapters quickly bring non-specialists up-to-speed * Extensive DWDM (Dense Wavelength Division Multiplexing) coverage * Advanced topics and limited math covered in side-bars' * Free space optical (wireless fiber optics)

A complete guide to creating usable, realistic game characters with two powerful tools Creating viable game characters requires a combination of skills. This book teaches game creators how to create usable, realistic game assets using the power of an open-source 3D application and a free game engine. It presents a step-by-step approach to modeling, texturing, and animating a character using the popular Blender software, with emphasis on low polygon modeling and an eye for using sculpting and textures, and demonstrates how to bring the character into the Unity game engine. Game creation is a popular and productive pursuit for both hobbyists and serious developers; this guide brings together two effective tools to simplify and enhance the process Artists who are familiar with Blender or other 3D software but who lack experience with game development workflow will find this book fills important gaps in their knowledge Provides a complete tutorial on developing a game character, including modeling, UV unwrapping, sculpting, baking displacements, texturing, rigging, animation, and export Emphasizes low polygon modeling for game engines and shows how to bring the finished character into the Unity game engine Whether you're interested in a new hobby or eager to enter the field of professional game development, this book offers valuable guidance to increase your skills.

At the outset of the twentieth century, the Nivkhi of Sakhalin Island were a small population of fishermen under Russian dominion and an Asian cultural sway. The turbulence of the decades that followed would transform them dramatically. While Russian missionaries hounded them for their pagan ways, Lenin praised them; while Stalin routed them in purges, Khrushchev gave them respite; and while Brezhnev organized complex resettlement campaigns, Gorbachev pronounced that they were free to resume a traditional life. But what is tradition after seven decades of building a Soviet world? Based on years of research in the former Soviet Union, Bruce Grant's book draws upon Nivkh interviews, newly opened archives, and rarely translated Soviet ethnographic texts to examine the effects of this remarkable state venture in the construction of identity. With a keen sensitivity, Grant explores the often paradoxical participation by Nivkhi in these shifting waves of Sovietization and poses questions about how cultural identity is constituted and reconstituted, restructured and dismantled. Part chronicle of modernization, part saga of memory and forgetting, In the Soviet House of Culture is an interpretive ethnography of one people's attempts to recapture the past as they look toward the future. This is a book that will appeal to anthropologists and historians alike, as well as to anyone who is interested in the people and politics of the former Soviet Union.

Featuring chapters by selected contributors to the second international Ontology for the Intelligence Community (OIC) conference, this book offers a partial technology roadmap for decision makers in the field of information integration, sharing and situational awareness in the use of ontologies and semantic technologies for intelligence.

Luxurious, sumptuous, soft, and supple--indulge in the amazing textures and colors of silk and silk-blend yarns. Learn the ins and outs of knitting with these versatile fibers; then knit 20 projects that range from romantic elegance to chunky chic. Even confident beginners can knit these gorgeous designs! Spoil yourself with silk.

"This dynamic text applies physics concepts and equations to practical, real-world applications of semiconductor device theory"--

This thought-provoking collection not only takes us into the past and the future, but also explores what might happen if we attempt to manipulate time to our own advantage. These stories show what happen once you start to meddle with time and the paradoxes that might arise. It also raises questions about whether we understand time, and how we perceive it. Once we move outside the present day, can we ever return or do we move into an alternate world? What happens if our meddling with Nature leads to time flowing backwards, or slowing down or stopping all together? Or if we get trapped in a constant loop from which we can never escape. Is the past and future immutable or will we ever be able to escape the inevitable? These are just some of the questions that are raised in these challenging, exciting and sometimes amusing stories by Kage Baker, Simon Clark, Fritz Leiber, Christopher Priest, Kristine Kathryn Rusch, Robert Silverberg, Michael Swanwick, John Varley and many others.

This Teacher Support file comprehensively supports the New National Framework Mathematics 8* pupil book, which is an ideal resource for lower ability pupils targeting National Curriculum Levels 4 -5.
